

HySolate SyntX Dam

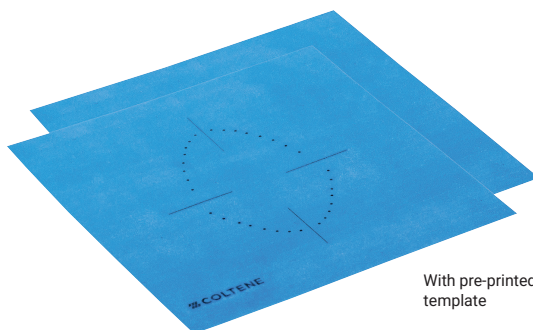

The most advanced latex free dental dam for faster isolation and confident retraction.

Benefits

- ✓ Extremely elastic and resistant ensuring stability and impeccable isolation
- ✓ Same retraction properties as the best latex dams
- ✓ Easy to position even in complex operative situations
- ✓ Blue color enhances contrast for improved visibility
- ✓ Pre-printed on one side
- ✓ 100% latex free, non-allergenic polyisoprene dam

Why HySolate SyntX?

- 1 No tearing during placement
- 2 Reliable isolation every time
- 3 Pre-printed for faster punching

With pre-printed template

HySolate SyntX Dam is made of **Polyisoprene** which combines exceptional elasticity and tear resistance without the allergy risks associated with natural latex.

Clinical case provided by Dr. Alessio Zanza

"I had the pleasure of testing the new HySolate SyntX Dam from COLTENE in advance, and I was truly impressed. Its ease of use, combined with an extremely elastic and resistant material, makes every application quick and precise. Contact points are easily overcome without risk of tearing, while the color optimizes visual focus and is perfect for clinical photography. Moreover, the fact that it is latex-free makes it ideal even for allergic patients. Highly recommended."

Dr. Alessio Zanza, Rome, Italy
